

FINESSE

FEEDING SCHEDULES

Natural Granen offers a number of generic schedules as a guide for nutrition and supplements, from breeding to moulting and the rest period.

These are of course ideal standard situations. Differences in individual circumstances and local differences such as weather, manner and timing of basketing, race conditions, must be also taken into account. The fancier must always use his/her own intuition about the specific needs of his pigeons and make adjustments if necessary.
